Citrus Hack is the "Inland Empire's First Major Collegiate Hackathon". The event will host students from schools all over Southern California. They'll be spending 42 hours hacking on some of the best software and hardware projects they can come up with.

Citrus Hack is entirely student run. It's hosted by the local ACM chapter of UC Riverside. Our goal is to contribute to the growing tech scene in the Inland Empire and surrounding areas. We want to showcase what our hackers have to offer. We'd love nothing more than to build lasting relationships between tech companies and our community.

This hackathon will give sponsors access to some of the best hackers, developers, designers, and tech-minded students around. Sponsors will have the opportunity to recruit our hackers. Sponsors will also be able to demo their products and APIs to a wealth of fresh and untapped developer talent. Promote your brand and services, and find your next new employee at Citrus Hack!

➔ Citrus Hack will be held at the University of California, Riverside

➔ Citrus Hack will be **42-hours** long, **February 28th, 6pm - March 2nd, 12pm**.

➔ We expect somewhere around 80+ students to be participating. We are planning to host students from UCR, UCI, UCLA, USC, Cal Poly Pomona, Cal State San Bernardino, RCC, Cal Baptist, and many other local colleges.

Why we need your support

There are so many great things we want to provide for our hackers, but to do that, we need help from you!

As a Citrus Hack sponsor, your support will help us fund meals and beverages throughout the event. You'll also fund some great prizes for our winners. Outside of monetary support, we'd also love for you to:

Swag! Promote your brand at Citrus Hack! Hackers love free swag. They'll stick your stickers, wear your T-shirts, and brag about your awesomeness to all their friends who missed out!

Send company outreach. Developers and Evangelists are always welcome! Hackathons are just as much about learning as they are about creating. We'd love to have your experienced Hackers come and mentor our young fledglings. Teach them all about your awesome products and APIs, and show them how it's done!

Anything else you can think of…! We are *extremely* motivated. Have your own ideas about what you'd like to sponsor at our event? We will work closely with you to realize it. Just contact us at citrushack@gmail.com

Please check out the sponsorship tiers in the table below.
If you're ready to become a sponsor, or have any questions, or are just interested in what we're doing, feel free to contact us!
